## Left-over Jelly

*Simple cot quilt(s) with left-over strips*

Block size: 8 inches

Quilt size: 30 x 38 inches

## Requirements

- 2½ inch strips – as many as you can find and no shorter than 5 inches. For a scrappy look the colours don't matter but for a more ordered look you might want to make sure you have at least a 20 inch length (or 4 x 5 inch lengths) of any one colour.
- 1m Contrast(s), or the equivalent in 2½ inch strips

\*You could just go completely scrappy and use all left-overs, just divide them up into lights and darks.

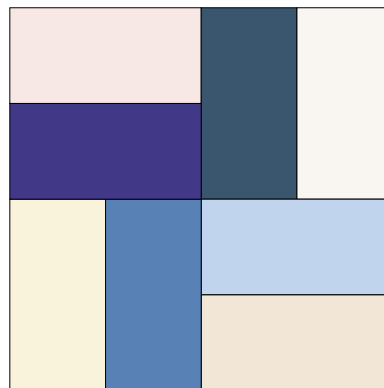

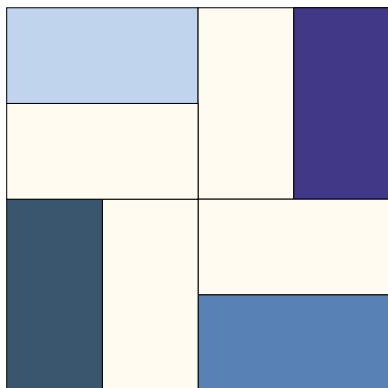

- 0.25m Border one
- 0.5m Border two (or use more scrap strips)
- 1m backing
- 1m wadding
- 0.5m binding

## Cutting

From contrast cut:  
6, 2½ inch strips

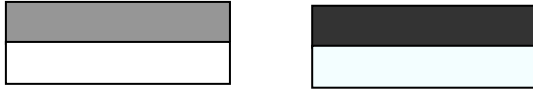

From Border One cut:  
4, 1½ inch strips

From Border Two cut:  
4, 2½ inch strips

## Block

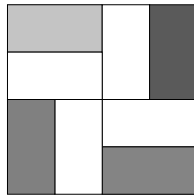

Stitch 2½ inch wide strips of contrasting fabric to left-over jelly roll strips to make as many strip pairs as you can.

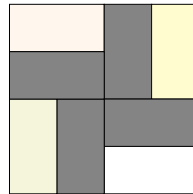

Cut paired strips into 48, 4½ inch squares.

Sew these block units into pairs then four –

either

or

For a more ordered look you may need to lay all your units out first until they give a pleasing design. For a scrappy look, just get stitching.

To make a small quilt suitable for a crib or cot you will need 12 blocks.

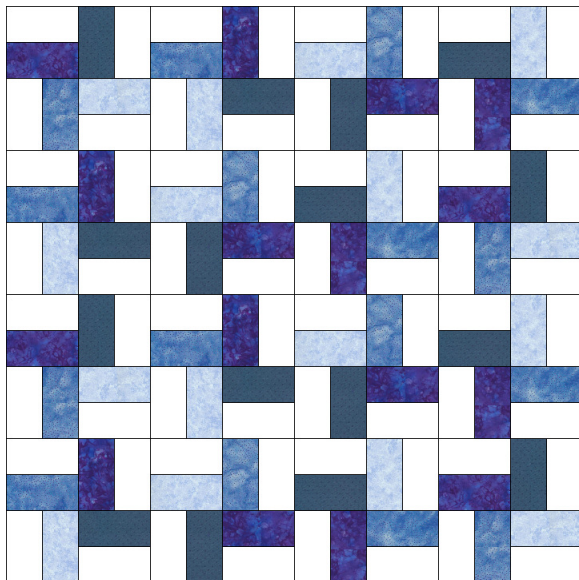

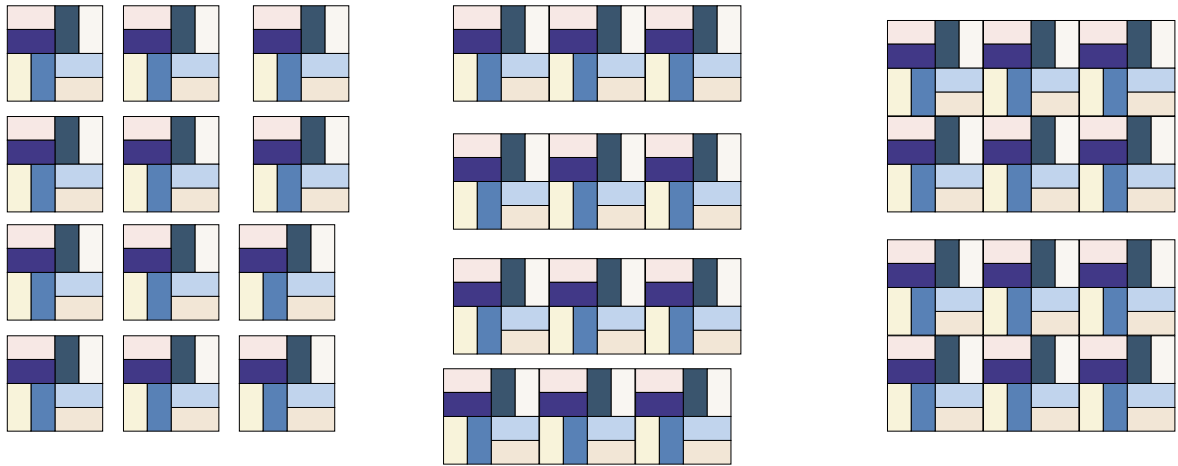

## Quilt top

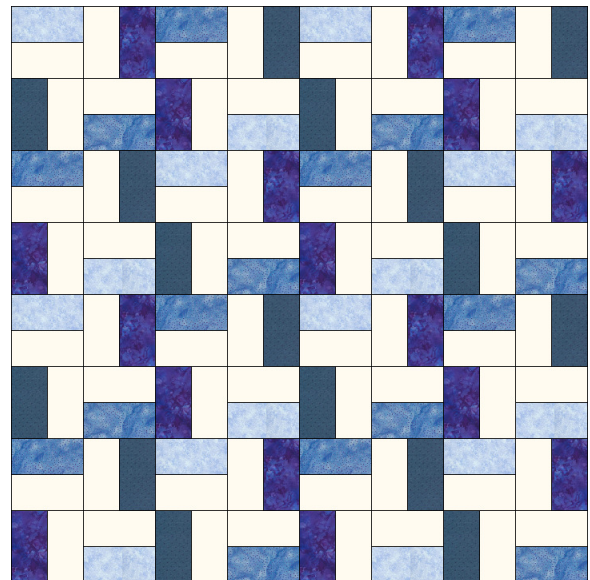

Arrange blocks as desired.

Stitch into rows.

Stitch rows together to complete quilt top.

Either

or

## Borders

### *Border One*

Measure length of quilt through the middle.

Cut two 1½ inch strips this length and stitch to sides of quilt. Press.

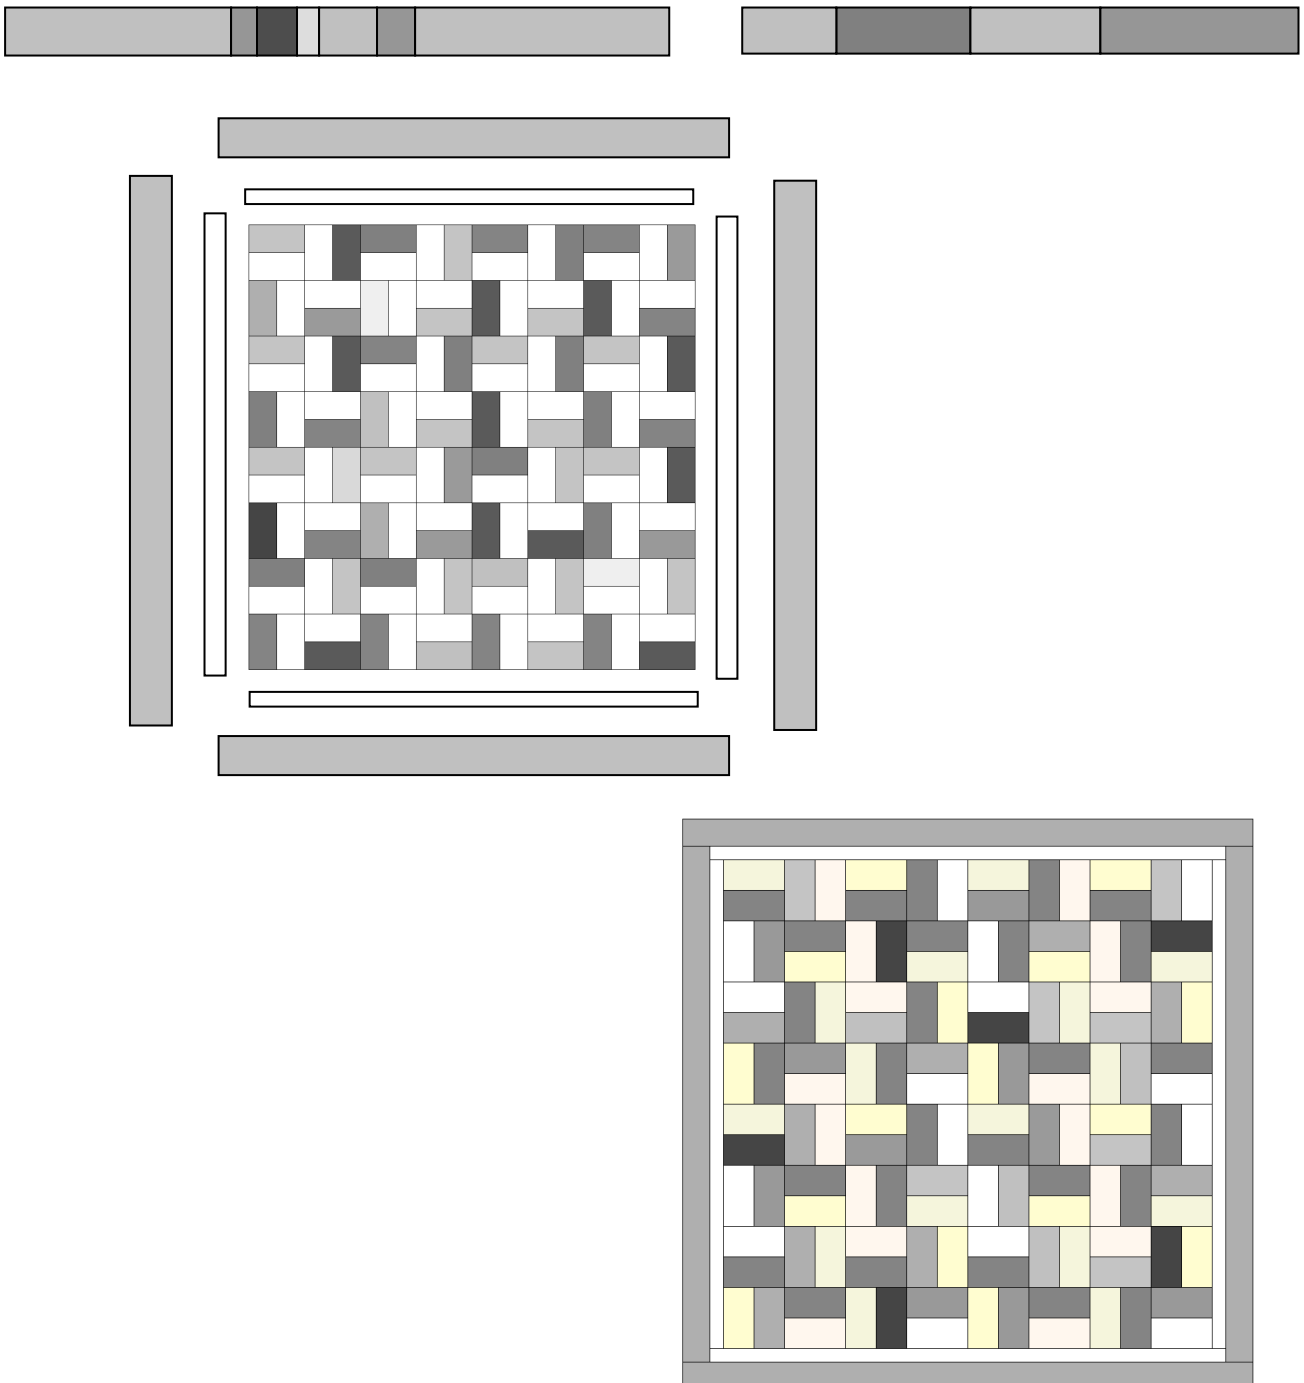

Measure quilt across middle.

Cut two more 1½ inch strips this length and stitch to top and bottom of quilt. Press.

### *Border Two*

Repeat as for Border One using 2½ inch wide strips.

OR – If you still have bits of jelly roll left over then try a pieced or piano key border – or add some piano key bits to a plain border.

## **Completion**

Cut backing and wadding about an inch larger all round than quilt top. Sandwich the three layers and pin or tack together.

Quilt as desired. These were just 'stitched in the ditch'.

Bind using your preferred method.

Add a label and you're done.
